Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 4, 5, and 8-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1-3-05.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 6, 7, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Cope.

Cope discloses an anchor comprising:

- A swivel 11;
- First length of sting 20 extending from the first end 13;
- Second length of sting 12 extending from the mid point;
- An axial bore from first end to the midpoint;
- A radial bore extending from the bore to the surface; and
- Wherein there is only one sting.

4. Claims 1-3 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Cragg.

Cragg discloses an anchoring system comprising:

- A swivel 14;
- A Groove;
- A first and second length of sting 20 & 40;

Art Unit: 3732

- A groove in the swivel; and
- An attachment means for the sting.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cragg or Cope in view of Dreyfuss.

Cope and Cragg lack the use of different filaments. Dreyfuss discloses the use of different color strands. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Cope and Cragg with different color strands as to identify the strands.

7. Claims 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cragg.

Cragg does not clamp the strands. However the reference does teach the use of a securing element. It would have been obvious to one of ordinary skill as a matter of design choice to use a clamp.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ferragamo and Kensey et al. disclose relevant art to the instant application.
